ATM Tips

1. Walk away from an ATM if you notice someone watching you or if you sense something is wrong with the machine.
2. Never keep a written copy of your PIN in your wallet or purse.
3. When entering your PIN. Stand close to the machine and hold your hand over the keypad or screen to make it more difficult for a person or camera to watch you.
4. Beware of strangers offering to help you with an ATM that appears disabled and notify someone responsible for the security of the machine.
5. Regularly review your account statement and check for unauthorized transactions. If you find one, contact your financial institution immediately.
